FROM: Gwyn Thomas DATE: July 21, 2005

SUBJECT: On-Street Revenue Results

MEETING DATE: Tuesday, July 26, 2005

RECOMMENDATION:

That this report be received for information purposes.

BACKGROUND:

At its meeting held Wednesday June 1, 2005, the Board received for information the memorandum entitled "On Street Revenue Results", a summary of the revenue performance for the On Street program for the month of April 2005. In that report the Board was informed that through the deliberations of the Budget Review Committee the 2005 budget estimate of \$35,500,000 for the on street program had been revised and for the purposes of this report and future 2005 revenue analysis, increased to 36,321,000.

This revised figure is the gross revenue number as approved by Council. It should be noted that the Toronto Parking Authority did not agree with a portion of this budget figure and it should be reduced by \$575,000. The Budget Review Committee without any justification or explanation added in the amount of \$350,000. Additionally \$225,000 has been left in the gross revenue budget number despite Council's reversion of the decision of the Budget Review Committee to include anticipated revenue from the City's waterfront parks. Approximately \$250,000 was correctly added to adjust for the additional revenue anticipated from 2005 rate increases. The corrected budget figure for 2005 should be \$35,746,000.

Recorded revenue in May 2005 was \$3,060,680.67, falling short of the revised May budget estimate of \$3,116,243 by \$55,562. Recorded revenue in June 2005 was \$3,102,711.04, falling short of the revised June budget estimate of \$3,252,645 by \$149,934.

Recorded revenue in January 2005 was, \$2,336,739.92, \$168,511 under the revised 2005 budget estimate of \$2,505,250. Reported revenue in February 2005 was \$2,660,652.61, exceeding the revised 2005 budget estimate by \$75,379 and in March 2005 reported revenue was \$3,108,239.53 exceeding the 2005 budget estimate by \$36,989. Recorded revenue in April 2005 was \$3,044,428.66, falling short of the revised April budget estimate of \$3,092,416 by \$47,987.

The recorded revenue year to date for 2005 is \$17,313,451.37, \$309,628 under the revised 2005 budget estimate of \$17,623,079 for this period. When the year-to-date revenue in June is compared to the corrected budget adjusted number of \$35,746,000, the performance of the on street program is extremely close to reaching our budget target.

Overall, the June 2005 revenue exceeded the results for June 2004 by \$31,000 and under performed budget results by \$264,000. The under-performance was more pronounced in the attended facilities.

The results by various geographic areas are indicated on Maps 1 & 2.

The first half revenue for 2005 was equal to 2004. This is indicative of a stable activity level in the market. When preparing the revenue budget for 2005, it has been expected that improvements in the local economy would have resulted in increases to the 2005 revenues above 2004. The static results are consistent with statistics, which indicate that the office vacancy rate in the City has not changed over the past year, and that employment levels are stable.

Other factors that may be suppressing increases in parking usage are:

- The high fuel costs; and
- The aggressive campaign by the TTC to attract riders.

We are pursuing more detailed statistics on local employment levels, transit ridership trends, and economic indicators.

SUBJECT: Winter Maintenance Contract - 2005-2010

Toronto Parking Authority Off-Street Surface Facilities

MEETING DATE: Tuesday, July 26, 2005

RECOMMENDATION:

That It is recommended that the contract for the provision of winter maintenance for the Toronto Parking Authority off-street parking facilities for the five (5) year term commencing November 1, 2005 and ending April 30, 2010 be awarded to Across Canada Construction for the total contract price of \$5,175,000 (annual indexed price changes not included)

BACKGROUND:

On July 4, 2005 the Toronto Parking Authority issued a Request for Proposal (RFP) for the winter maintenance contract for 149 off-street, surface parking lots, a total of 9658 parking spaces. In general terms, proponents were instructed to submit proposals for salting, snow plowing and snow removal at these facilities, providing the personnel, equipment, and materials required to provide these services for the term of the contract. Prices submitted are inclusive of all applicable costs for the five-year term of the contract. Soliciting a fixed cost for this service ensures an accurate and, in the longer term, predicable annual budget allocation and it eliminates the Authority's exposure to the implications of unpredictable winter weather conditions and the consequent fluctuations in service cost.

Specifically, proponents were instructed to submit the following information as the basis for their proposal:

- A list of references for whom the Proponent has completed recent work, including a brief description of the work.
- A history of the Proponent's firm detailing location(s), years in business, number of employees, ownership, etc.
- A list of sub-contractors to be utilized in the performance of the work.
- A work plan methodology on how the work will be performed at each location,
- A detailed list of equipment owned, leased and proposed both dedicated and shared
- Staff commitments, supervisory provisions.
- Details of the off-property site(s) to which snow is to be dumped, to ensure that it is lawful and performed in an environmentally friendly manner.

Proponents were informed in the RFP that the selection of a Proponent to perform work will be based on these submission requirements and methodology; adherence to all other submission requirements set out in the RFP; and the prices set out in the Form of Proposal. Proponents were also informed that failure to comply with all and or taking any exceptions to the conditions specified in the RFP might render their proposal unacceptable.

DISCUSSION

Unlike a Tender document where the work specifications are predetermined and price becomes a more predominant factor in the decision making process, a Request for Proposal provides a less detailed, more general level of instruction or scope of work for the proponent to consider. The proponent is instructed to submit a price for that work but more importantly, a comprehensive work plan to substantiate the submitted price. The work plan will provide a detailed approach to the work that must include a list of equipment to be used as well as staff allocations and supervision. This information must be provided as it plays a significant role in evaluating the cost of the work in association with the contractors ability to satisfactorily undertake the contract.

The Toronto Parking Authority currently has very effective performance standards and operational procedures for winter maintenance that have been in place for the past six years. The purpose of issuing this RFP was to reexamine the work place to solicit from those in the industry current methodologies, technologies and materials that may assist the Authority in updated our standards and procedures in this area.

Nine companies were invited to submit a RFP. A list of those companies is Attachment No. 1. Three submissions were received from the following firms:

Across Canada Construction Gazzola Paving Limited Pave-Al Limited

Attachment 2 is a chart summarizing these submissions in terms of each proponent's compliance with the submission requirements. The Board will note that only two firms, Gazzola Paving Limited and Across Canada Construction Limited submitted complete proposals. Pave-Al Limited to submit references, company history, a subcontractor list, work plan, equipment list, staff allocation and snow dump details. As a result the submission Pave-Al Limited has been considered unacceptable and was not included in the evaluation of proposals

The submissions from Gazzola Paving Limited and Across Canada Construction Limited were evaluated and weighted on the following criteria, work experience, work plan, equipment/personnel, and price.

In the evaluation of the submissions from Across Canada Construction Limited and Gazzola Paving Limited both companies submitted similar work plans and allocated similar quantities of equipment and personnel to undertake the work. As the Toronto Parking Authority's contractor for the past several contracts Gazzola Paving Limited has the benefit in experience while the pricing submitted by Across Canada Construction Limited is significantly lower than that submitted by Gazzola Paving Limited. On the basis of this evaluation, it is recommended that Across Canada Construction be awarded this contract.

MEMORANDUM

TO: Board of Directors FILE NO:

FROM: Teresa Toigo DATE: July 22, 2005

SUBJECT: SUGGESTED BOARD MEETING CHANGE:

Rescheduling of December 5, 2005 Board Meeting

MEETING DATE: July 26, 2005

City Council, at its meeting of June 14, 15 and 16, 2005 approved revisions to the 2005 Schedule of Meetings. As a result of rescheduled meetings of Council, Committees, etc, City Council will now be sitting on December 5, 6 and 7th with Special City Council meetings for the Capital Budget arranged for December 8th and 9th.

As the Toronto Parking Authority's December 5th, 2005 Board meeting conflicts with City Council's meeting, I am suggesting one of the following two alternative dates for the TPA's Board meeting to accommodate Deputy Mayor Feldman and Councillor Kyle Rae's schedules:

Tuesday, November 29th at 4:00 p.m. Wednesday, November 30th at 4:00 p.m.

For your reference, the following are the remainder of scheduled TPA Board meetings for calendar year 2005:

Tuesday, September 13, 2005 – 4:00 p.m. Monday, October 17 – 4:00 p.m. Monday, November 7 – 4:00 p.m.
